Purchase and Installation

To install our new free April 1 release, please follow the installation steps below:

- 1) Go to the [Beautyflute Pro page](#) and add it to your UJAM cart
- 2) Complete the purchase (don't worry, it's free!)
- 3) Install Beautyflute Pro using the [UJAM App](#)

Using the Plug-in

Enjoying the beautiful sonic realm of Beautyflute Pro is as easy as can be:

- 1) Create an instrument track
- 2) Load Beautyflute Pro
- 3) Play any MIDI notes from G3 through F5
- 4) Play with the three sound options until you've found the character that suits you

Sound Parameters

Models

- **Vanilla:** If you're not yet a daring Beautyflute connoisseur - it almost sounds like a well-tuned recorder. Almost.
- **Diva:** Dials in way more attitude - express your feelings in ways unknown!
- **Sisters:** Kind of a "Beautyflute" choir - great for backgrounds but also for doubling a Vanilla or Diva solo track in the chorus.

Emoción

- **Delulu:** Again, the first entry is the least emotional - for a "normal" recorder sound, choose this one.
- **Tantrum:** Every note is followed by a little extra kick of rage.
- **Drunk:** When the mouth is too sloppy to control the end of notes - this is the sound you get. Combines well with Diva for maximum 'tude.

Ambience

- **Dry:** Sounds like back in the classroom.
- **Poetic:** Turns Beautyflute into a meditation miracle.
- **Emotional:** Adds a chirpy echo, works best with sparse melodies.

Tip: Combine Diva, Drunk and Emotional for maximum emoçional delivery!
